

VivaMarket Churn Intelligence System

From churn risk to governed, evidence-backed retention learning

BUSINESS DECISION LOOP

**DETECT → EXPLAIN → ACT → MEASURE →
REACT → LEARN**

PRIORITIZATION

**1.00
Precision@Top
5%**

Focus retention effort on customers with the highest modeled risk.

ACTIONABILITY

**Explainable
retention
actions**

Turn risk into reviewable, testable interventions.

MEASUREMENT

**Primary KPI
+ guardrails**

Judge actions by evidence, not by model confidence.

CONTINUOUS IMPROVEMENT

REACT

Evidence-backed next actions for the next cycle.

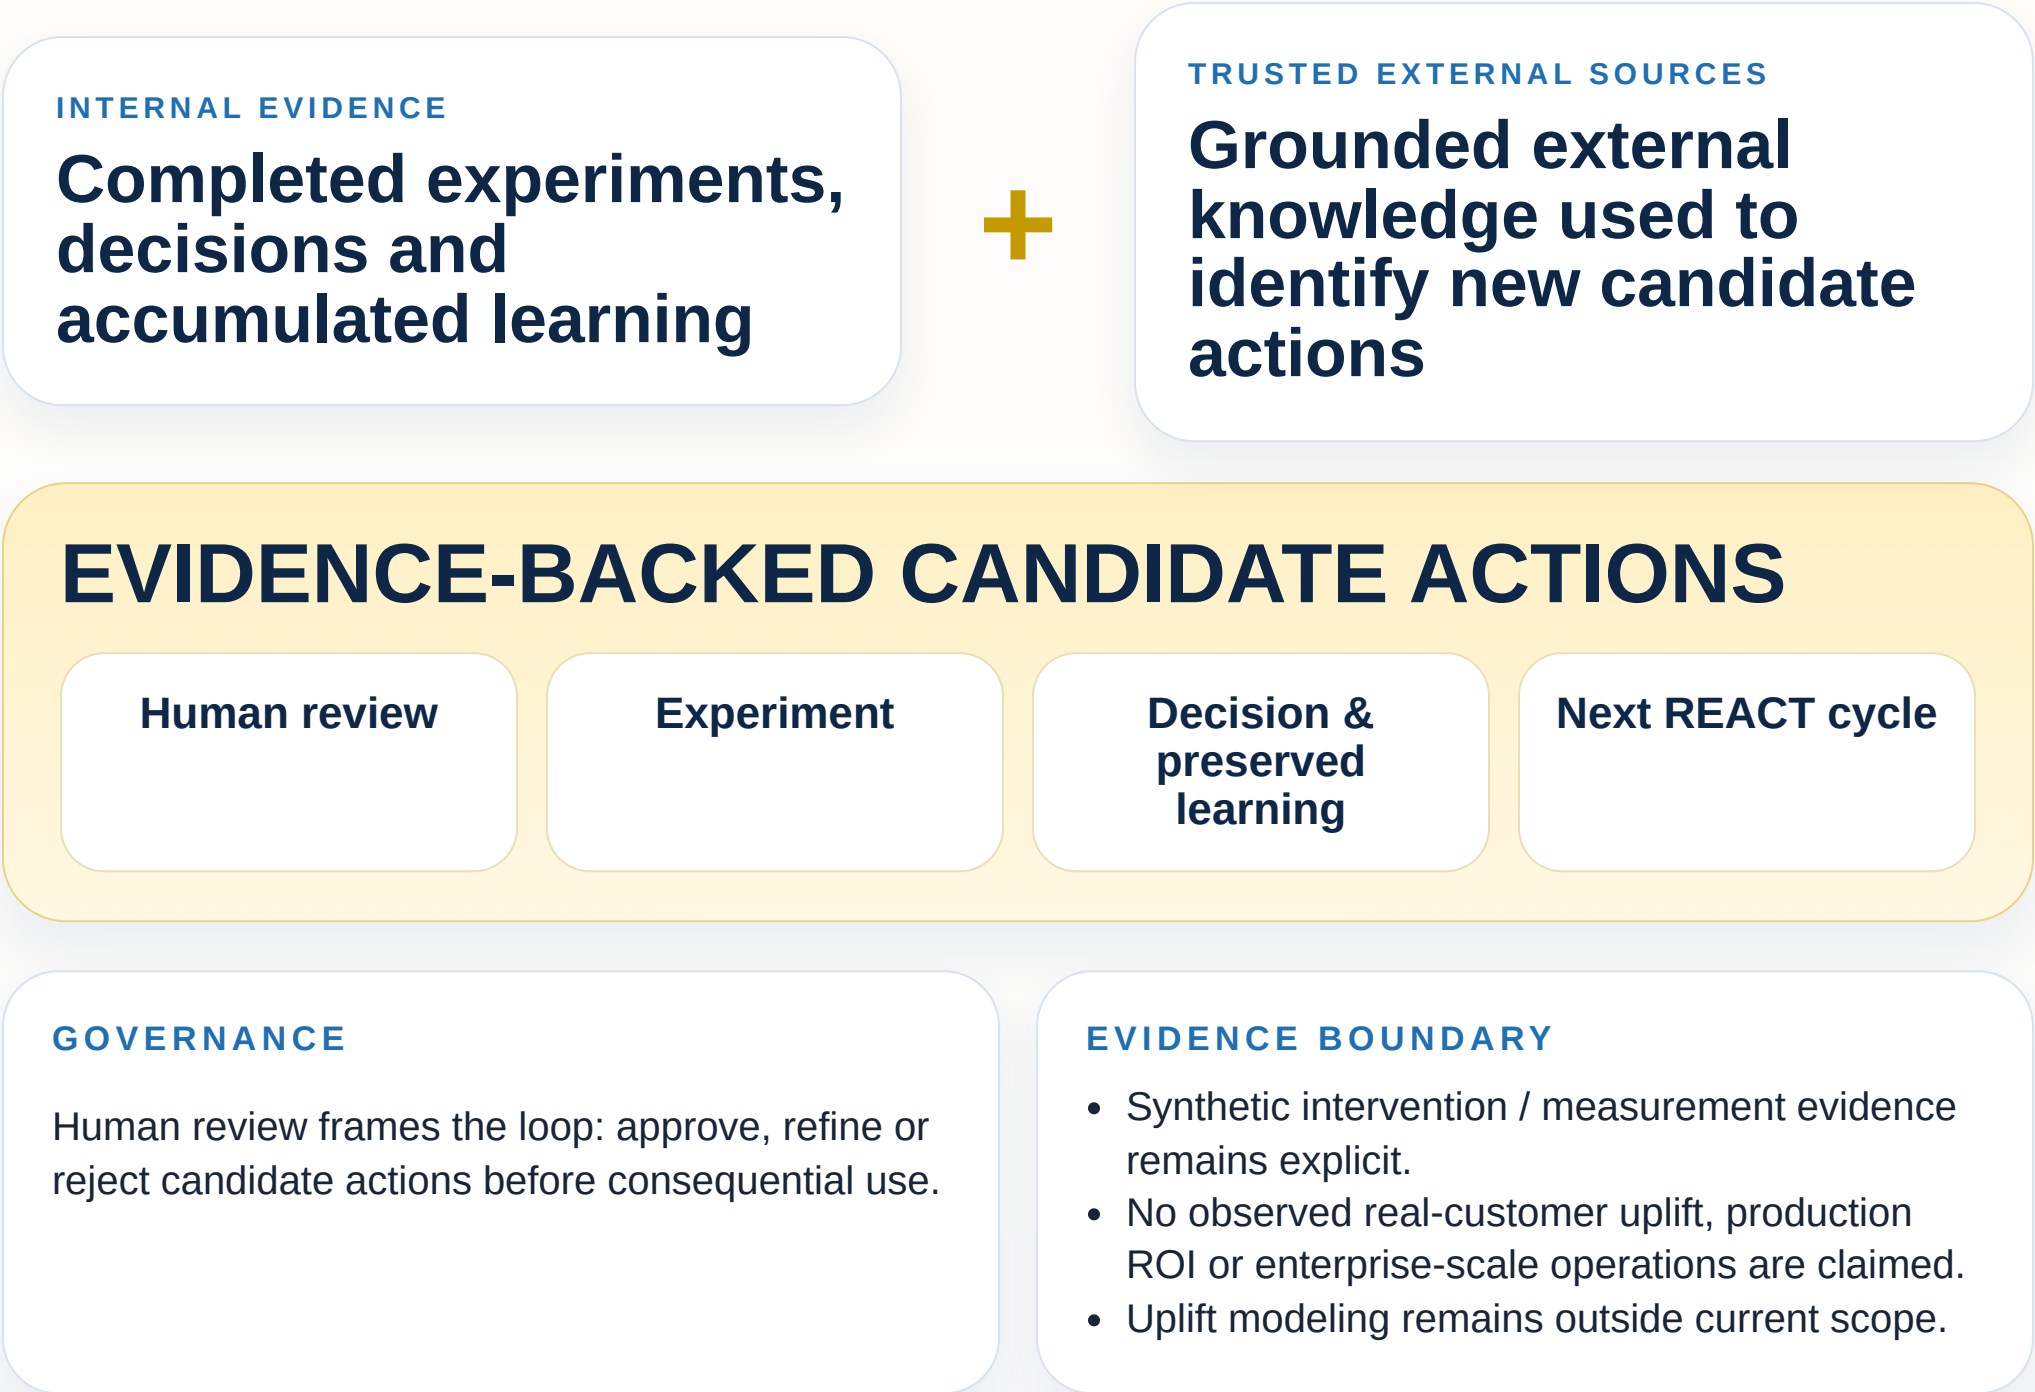

WHY IT MATTERS

- Who should we retain?
- What should we do?
- Did it work?
- What should we try next?

BUSINESS INTERPRETATION

- Prediction is one component, not the final product.
- The system connects action, measurement and governed learning.
- Consequential decisions remain controlled and traceable.

A governed loop from action to evidence — and back to action

Portfolio REACT uses validated free-access sources; production deployments can connect paid research APIs to broaden external evidence coverage.
